

Spanish NTI Lesson 1

Obj. Create a family tree

Procedure: You will create a family tree, either real or imaginary that includes one set of grandparents, their children, and the grandchildren. You will be one of the grandchildren and will label that spot as “yo”. Each family member’s relationship to you will be labeled in Spanish. I do not know your families, so that if you have a big family, you don’t have to include everyone-I won’t know. You will include a picture for each person on your family tree. These can be hand drawn, real pictures, or pictures from the computer or magazines.
