

Matewan Pk-8

NTI

Grade Level: 3rd

Content Area: Math

Date: May 14, 2020

Teacher: Mrs. Lipps

Teacher's email: mrdotson@k12.wv.us

Another way to contact me is: Livegrades, Google Classroom, or the class Facebook page (Mrs. Lipps Third Grade Class – link is on the P.A.W.S. page)

Note from Teacher:

Hello! I guess you've already heard by now that we won't be returning to school this year. This means I won't get to finish my time with you or hug you goodbye as you leave my classroom to become fourth graders. I feel like we had so much left to do, & I hope that I have prepared you enough for next year. Please know that my door is always open. As you get ready to walk into your fourth grade classrooms, don't forget that I am just next door or across the hall. Stop in to say hello or wave as you pass by. I miss you! Don't forget me, because I promise this is a year that I will never forget.

Stay home and stay safe! You and your family are always in my prayers.

Today's Lesson:

In our last days of school, we learned about producers, consumers, and decomposers. Below is a review of that:

- **Producers** - living organisms that make their own food.
- **Consumers** - cannot make their own food, so they need to consume (eat) plants and/or animals.
- **Decomposers** - They eat decaying matter - dead plants and animals and in the process they break them down and decompose them

Name two living things that are producers, two living things that are consumers, and two living things that are decomposers.

Online Resources: These resources are optional. They are not required.
